Environics Received CBRN System Orders for Over 20 Naval & Maritime Vessels in 2021

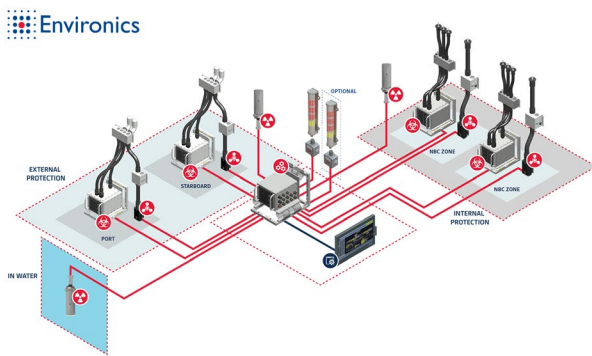

Image 01

Environics CBRN Monitoring Systems are fully scalable to suit for different vessel types, with distinct requirements. This is the representation of a standard layout system recommended for relatively small ships, such as Corvettes and Patrol Vessels.

Before the delivery to the end-customer, Environics Naval & Maritime CBRN Monitoring Systems go through a Factory Acceptance Test (FAT). These are photos of two different types of systems tailored to meet different customer specifications and requirements, ready for FAT: with rugged casing devices (on the left) and normal casing devices (on the right).
